ICS, useful experience feedback

A hot topic, the assessment of ICS in the experience as well as a global view of

The implementation of ICS in the customs organizations

Or should we say customs organizations, considering the diversity of the situations... The implementation

At the heart of its presentation, CONEX demonstrated 3 difficulties which have been highlighted by the E

1) A problem of access to information

2) A problem of transparency, of competition and monopoly, in ports and airports

3) A problem of strategic data protection in Europe

The Commission is aware of the difficulties evoked by CONEX, all the more considering the current economic situation.

"From now on, CONEX will be the main player in the customs sector and can address the Commission on this matter."
