

Solution for formulating security declarations and ensuring the electronic exchange of messages with customs administrations.  
(EU/ICS, UK/ S&S GB, UK/GVMS, JP/AFR)

## A UNIQUE SOLUTION TO A MOSAIC OF COMPLEXITY AND SECURITY OBLIGATIONS

**SAFE VIA CONEX™** currently covers the European Import Control System (ICS1 and ICS2, currently being deployed) for all modes of transport (air, maritime, road, rail and inland waterways).

Since the United Kingdom's exit from the EU, SAFE via conex™ also supports the requirements of the new British security system, GB S&S.

Through our updated solution for ICS2, **SAFE VIA CONEX™** will enable the communication of advance cargo information for safety and security risk analysis.

### ICS IMPORT CONTROL SYSTEM

With **SAFE VIA CONEX™**, you benefit from a single point of access to exchange mandatory security messages with most Member States of the European Union. Security declarations are required for all goods entering the European customs territory and **SAFE VIA CONEX™ ICS** covers all your Entry Summary Declaration-linked exchanges with the customs administrations: declaration creation and transmission, amendment request, diversion request, arrival notification.

### GB S&S SAFETY AND SECURITY

**SAFE VIA CONEX™** is also connected to the UK S&S GB system to allow you to manage security declarations required by the United Kingdom upon importing goods into its territory (excluding Northern Ireland for which an EU ICS declaration is required).

### GVMS GOODS VEHICLE MOVEMENT SERVICE

In the context of the UK's exit from the European Union, **SAFE VIA CONEX™** provides a connection to the UK's GVMS (Goods Vehicle Movement Service) system. Enriched with customs and security data, the logistics envelope that is created makes it possible to obtain a GMR identification number which, provided that the information it includes is valid, allows embarkation on the means of transport crossing the border.

### AFR

**SAFE VIA CONEX™** manages and electronically transmits security declarations for goods arriving into the Japanese customs territories.
