

SAFE VIA CONEX™
MANAGE YOUR PRE-CLEARANCE FORMALITIES
WITH A SINGLE SOLUTION

With **SAFE via conex™**, you take control of your **ENS declarations** and **logistics envelopes** thanks to a reliable, scalable solution designed for performance. Its **intuitive interface** and **data integration tools streamline your processes**, regardless of the volume of your operations.

By relying on our platform, you are completely freed from the technical constraints associated with electronic exchanges. **SAFE via conex™ ensures secure transmissions** to national and European administrations, for formalities that are **always compliant and perfectly controlled**.

FORMALITIES MANAGED BY SAFE VIA CONEX™

SECURITY DECLARATIONS

-  **IMPORT CONTROL SYSTEM 2**
ENS security declarations for goods entering the EU customs territory, as well as Norway, Switzerland and Northern Ireland.
-  **S&S GB - SAFETY AND SECURITY**
ENS security declarations for goods entering Great Britain.

LOGISTICS ENVELOPES and/or PNTS DECLARATION

-  **PNTS/ANTES (FR):** Formalities related to the presentation of goods and temporary storage declaration.
-  **ELO:** For the creation of *Enveloppe Logistique obligatoire* (Obligatory Logistics Envelope) and generation of ELO barcodes.
-  **GMR:** For the creation of logistics envelope addressed to the British GVMS.
-  **PBN:** For the creation of Pre-Boarding Notification Declaration addressed to Irish Customs.

OPTIMISE YOUR CROSS-CHANNEL FLOWS AND SIMPLIFY YOUR FORMALITIES WITH SAFE VIA CONEX™

For **cross-Channel flows**, **SAFE via conex™** centralises the information essential for smooth boarding processes. You avoid re-entering data, you gain speed, and your operations remain perfectly synchronised.

For **your imports from non-EU countries other than cross-Channel flows**, the intelligent re-use of data between ENS and PNTS/ANTES declarations saves you valuable time while reducing the risk of errors.

Combined with our customs clearance solutions, **SAFE via conex™** gives you **complete control** over the entire process, from pre-clearance to final clearance. You benefit from a **consistent, reliable and fully controlled data chain**.
